

THR880i TETRA handportable radio, secure mobility

AEG LAUNCHES HER RENTING ACTIVITY FOR TETRA TERMINALS DURING THE EUROPEAN TOP.

The first European Top organized by Hermann Van Rompuy this last 11th February, has been the scene of another première.

Indeed, the security service of the Council made use of the ASTRID network and TETRA terminals for the organization of this top. It's in this context that AEG Belgium rented out 30 **THR880i** and one office kit to the European Council.

Taking place at the Solvay Library, the top made it possible to launch the AEG renting service in style. AEG has more than 150 radios available for Astrid users for a service of short-term renting.
