

TETRA WORLD CONGRESS: “THE FUTURE OF CRITICAL COMMUNICATIONS”

AEG Tranzcom will participate this late may to the 12th international Tetra global Congress taking place in Singapore and having as theme: ‘THE FUTURE OF CRITICAL COMMUNICATIONS’.

This annual congress is the opportunity to meet senior figures from the Tetra community. AEG TranzCom will not miss this world rendezvous as from 25th to 27th May with workshops such as the future of Tetra, how to communicate with professionals and Tetra’s role in the future.

We kindly invite you to meet us in Singapore, and to discover our large spectrum of solutions in the field of TETRA technology.

As key product we will present our “Embarked radio station”, specially designed for Transport Companies such as the RATP. It contains an intelligent mobile digital radio terminal to be integrated in metro and railway cars, trams or busses, and allowing voice and data communication between the vehicle and the dispatching.

From TETRA terminals to the deployment of digital networks, from maintenance services to training sessions: AEG Belgium provides end-to-end telecom solutions and services for a wide variety of customers. We will be happy to meet you at our stand and to put our knowledge and experience at your service to find the solution you need!
